OBJECTIVE

Artificial Intelligence graduate with hands-on experience in **machine learning, computer vision, and NLP**, strengthened by co-op **training at KACST**. Skilled in building **end-to-end AI systems** from research to deployment, with a strong foundation in Python, TensorFlow, and data science. Seeking to apply my expertise toward building **real-world, scalable AI solutions** that deliver measurable impact.

EDUCATION

Bachelor of Science in Artificial Intelligence

Imam Abdulrahman Bin Faisal University (IAU),
College of Computer Science and Information
Technology
Dammam, Saudi Arabia
GPA: 4.52/5.0
Graduated: Aug, 2025

TECHNICAL SKILLS

Core AI/ML Skills

- Machine Learning, Deep Learning, NLP, Computer Vision (CV)
- Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, Hugging Face

Programming & Data

- Python, Java, C/C++, SQL
- Pandas, NumPy, Matplotlib, Seaborn

Tools & Deployment

- Git, GitHub, Docker
- Jupyter, VS Code, Cursor IDE

PROJECTS

Social Analytics Indicator Platform (FutVi)

- Built a scalable **AI-driven platform extracting 10k+ data points daily** for real-time sentiment and market KPI tracking, attracted sponsorship interest during development.

Agriculture AI Assistant(TerraMind)

- Built a Dockerized multi-RAG agriculture assistant using React, FastAPI, OpenAI, LangChain, and ChromaDB to support product lookup, agriculture knowledge retrieval, and base LLM comparison.

Anomaly Detection in Financial Transactions

- Built and optimized an autoencoder-based fraud detection model to identify and flag high-risk financial transactions.

PROFESSIONAL EXPERIENCE

Artificial Intelligence Engineer (Co-op)

King Abdulaziz City for Science and Technology (KACST)

— Riyadh, Saudi Arabia

Jun 2025 – Aug 2025

- Researched AI-driven methods for Parkinson's monitoring in an 8-week program at the National Institute for AI & Robotics.
- Processed and validated 50K+ video frames, optimized feature extraction workflows and baseline models.
- Achieved F1 0.58, AUROC 0.816, and 84.5% accuracy with MLP models; documented results for medical AI research.

Student Teaching Assistant – Machine Learning Lab (ARTI 406)

At Imam Abdulrahman Bin Faisal University

— Dammam, Saudi Arabia

Feb 2025 – May 2025

- Delivered hands-on Machine Learning Lab (ARTI 406) sessions for 34 students, supporting the first official lab revival in years and guiding Python-based ML.

AI & Robot Club, IAU, Innovation Team Leader

— Jan 2024 – Jun 2024

- Led AI prototype development and mentored peers on applied ML, CV, NLP, and generative AI projects; coordinated innovation workshops.

CERTIFICATIONS

- NVIDIA-Certified Associate: Generative AI LLMs – 2025
- Azure AI Fundamentals (AI-900) – Microsoft – 2025
- Advanced AI Program – KAUST Academy – 2024

ACHIEVEMENTS

- Placed 1st Place – IAU CPC Programming Competition
- Placed 3rd Place – Western Region Food Industry Hackathon (Jahlz)

EXTRACURRICULAR ACTIVITIES

- Contributed 270+ volunteer hours** to Vision 2030 initiatives
- Organized** Winter_IAU Event 2024 (Core Organizer)
- Managed** Astazid Student Council Event (Organizer & Manager)
